

Supplemental Information

Supplemental Figures and Tables

Supplemental Figure

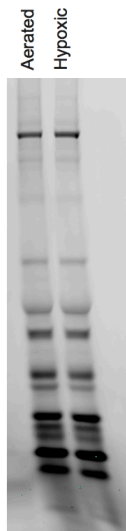

Figure S1, related to Figure 5 and Table 2. Reactivity of the FP-ABP Probe in Aerated and Hypoxic *Mtb* Lysate. Changes in probe binding shown in Table 2 are not due to reduced reactivity of the probe in hypoxic conditions.

Supplemental Tables

Supplemental tables are provided as Microsoft Excel documents.

Table S1, related to Figure 2. Identification of SHs and Quantitation of Activity Changes by LC-MS. Proteins are sorted by Rv number. Different tabs show conditionally active hits and hits grouped by enzyme family. Numbers in columns I-U represent log₂ AMT data. “Aer/Hyp FC”: Fold change between abundance in aerated and hypoxic culture.

Table S2, related to Figure 2. Labeled Proteins with Annotation other than “Hydrolase” or “Hypothetical Protein”. Proteins are sorted by Rv number. Numbers in columns I-AK represent log₂ AMT data. “Aer/Hyp FC”: Fold change between abundance in aerated and hypoxic culture.
